

CSCA-Vinnitsa Ltd provides all scope of engineering services: from the concept and design of control system up to on-site commissioning and ongoing service support.

Standard scope of work includes the following:

- Scope Definition and Budget
- Design Documentation and Estimates Development
- Application Software Development (PLC / SCADA / Data Base and Reporting)
- Equipment Supply and Assembling on our own site
- System Installation Supervision
- Commissioning and Startup
- Training (Operator/Engineer/Maintenance)
- Ongoing Warranty and Service Maintenance

Company has all necessary licenses and certificates for design and construction. Design documentation is developed according to state standards, regulations and guidelines.

Openness and flexibility of designed systems provide the possibility of further troublefree buildup and integration with existing or new developed systems.

In our projects we mostly use proved equipment and accessories of leading manufacturers to ensure high efficiency and reliability of proposed solutions. Up to now we have more than 10 year experience of working with such world-known companies as: Siemens, Mitsubishi Electric, Moeller EATON, DiniArgeo, Citect, Wonderware Intouch, ZPAS, Rittal, Moxa etc.

All our systems are provided with standard 12 month warranty since startup. In addition, we provide after-sales system support, what is especially actual for customers without their own maintenance staff.

Since 2001 our engineers have assisted in development of more than fifty projects for different industry branches (up to 2010 in the structure of "CSC-Automation" Vinnitsa Branch Ltd). The [list of main projects](#) is given bellow:
